EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ralph Locher on March 30, 2004.

The application has been amended as follows:

In claim 1, lines 9-10, delete "and between said oxidation buffer and said electrolyte/electrode unit".

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a fuel cell comprising a fuel-gas chamber formed between a bipolar plate and anode; wherein an oxidation buffer containing iron disposed in the fuel -gas chamber; wherein fuel-gas is permitted to pass between the oxidation buffer and bipolar plate.

The prior art, such as Quadakkers W0/009723006, teaches .a high temperature fuel cell comprising a bipolar plate coated with an iron material (abstract). The iron oxide layer is not disposed to permit fuel-gas to bass between the buffer and bipolar plate. In contrast, iron oxide is a coating in fuel-gas chambers of the plate. Therefore, the instant claims are patentably distinct from Quadakkers.

Conclusions

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
